PRODUCT CARE RECOMMENDATIONS

PRODUCT CARE RECOMMENDATIONS
Proper regular care and upkeep is necessary to ensure the continued high quality of Mamoli taps. Our recommendations:
- always dry the tap fittings with a soft cloth or chamois to prevent the formation of calcium deposits
- use a neutral liquid soap diluted in water for cleaning
- never use liquid detergents that contain abrasive substances, such as vinegar, ammonium, acetone, bleach, domestic cleaning acids or certain disinfectants. Products like these should not even be used for cleaning the sanitary fixtures in the vicinity of the installed tap.

RECOMMENDATIONS FOR MAINTENANCE
Decalcification: calcium and dirt buildup in the aerator filters may be removed by disassembling the aerator, immersing it in diluted vinegar (maximum concentration of 105 at 20°) and allowing it to soak for several hours. Afterwards, wash it with soap and water and rinse.
Spare parts: we recommend using original Mamoli parts only, available through authorized retailers.
