Mamoli – Sostenibilità

Mamoli si impegna a sviluppare prodotti e soluzioni che riducano il consumo energetico e lo spreco di risorse, integrando tecnologie avanzate e packaging sostenibile. Grazie ai continui investimenti nel dipartimento di Ricerca & Sviluppo, l'azienda è costantemente alla ricerca di innovazioni che rendano i suoi prodotti e processi più rispettosi dell'ambiente, delle persone e dei consumi. Per raggiungere questi obiettivi, Mamoli ha implementato impianti produttivi a circuito chiuso e tecnologie innovative.
L'acqua è una risorsa preziosa, e Mamoli offre soluzioni progettate per un uso responsabile. Le cartucce dei rubinetti consentono di limitare la portata d'acqua oltre il 50% della massima e di regolare la temperatura in uscita grazie a meccanismi avanzati di regolazione della leva. Inoltre, una gamma di areatori dedicati è disponibile per ridurre ulteriormente il consumo idrico, garantendo al contempo un'esperienza d'uso ottimale.
Con un approccio attento e consapevole, Mamoli ottimizza l'uso delle risorse, preserva le fonti energetiche non rinnovabili e perfeziona ogni fase produttiva tramite una pianificazione accurata.

EN

Mamoli – Sustainability

Mamoli is committed to developing products and solutions that reduce energy consumption and minimise resource waste by integrating advanced technologies and sustainable packaging. Through continuous investment in its Research & Development department, the company is constantly pursuing innovations that make its products and processes increasingly respectful of the environment, people, and responsible consumption. To achieve these goals, Mamoli has implemented closed-loop production systems and innovative technologies.
Water is a precious resource, and Mamoli offers solutions designed for its responsible use. The tap cartridges limit water flow by over 50% of the maximum capacity and regulate the outlet temperature through advanced lever adjustment mechanisms. Additionally, a range of dedicated aerators is available to further reduce water consumption while ensuring an optimal user experience. With a careful and conscious approach, Mamoli optimises resource use, preserves non-renewable energy sources, and perfects each stage of production through meticulous planning.

Mamoli – Friendly Design/Qualità

Mamoli crede che la progettazione debba sempre promuovere il benessere, la sicurezza e la salute di chi utilizza quotidianamente i suoi prodotti. La ricerca estetica e funzionale nasce da una progettazione accurata, che rende il design un valore condiviso e accessibile. Nei suoi processi produttivi, Mamoli impiega esclusivamente materiali certificati ACS, compatibili al 100% con l'acqua potabile, e leghe di ottone conformi al D.M.174. Tecnologie avanzate, come il processo galvanico PWP (Pure Water Process), l'uso di acciaio inox naturale e rivestimenti in PVD (Physical Vapour Deposition) — film metallici sottili applicati tramite tecniche innovative — assicurano standard di alta qualità.

IT 1938 Collection

Design Mamoli R&D

Questa collezione storica dal sapore Decò è una fedele riedizione di un progetto originale Mamoli prodotto nel 1938. Prende il nome dall'anno in cui è nata come omaggio alla storia dell'azienda e riprende l'estetica e l'immaginario tipico degli anni '30. Le linee decise e la forma squadrata della bocca di erogazione, così come le manopole a stella, richiamano infatti lo stile decorativo di quel periodo. I disegni tecnici dell'epoca sono stati studiati ed adattati alle esigenze attuali permettendo di ricreare tutti i componenti in ottone e le maniglie con preziosi intarsi con finitura PVD.

EN 1938 Collection

This historic collection with a Deco flavour is a faithful re-edition of an original Mamoli project produced in 1938. It takes its name from the year it was born as a tribute to the company's history and recalls the aesthetics and imagery typical of the 1930s. The bold lines and square shape of the spout, as well as the star-shaped knobs, recall the decorative style of that period. The technical drawings of the time were studied and adapted to current needs, allowing all the brass components and handles to be recreated with precious inlays with a PVD finish.

IT Gio Ponti Collection

Design Gio Ponti

Il rubinetto Gio Ponti è stato disegnato dal celebre architetto italiano nel 1953. Ciò che lo caratterizza è il particolare "angolo pontiano", un gioco di linee e inclinazioni che da vita al disegno iconico di una stella. Talmente all'avanguardia negli anni '50 da essere contemporaneo oggi, il che ha permesso l'adozione di una nuova tecnologia finalizzata al risparmio energetico nel pieno rispetto del disegno originale del maestro.

«Un'architettura è davvero bella se è bella ancora cinquant'anni dopo che sorse»
Gio Ponti

EN Gio Ponti Collection

The Gio Ponti faucet was designed by the famous Italian architect in 1953. What characterizes it is the particular "Pontian angle", a play of lines and inclinations that gives life to the iconic design of a star. So cutting-edge in the 1950s that it is contemporary today, which has allowed the adoption of a new technology aimed at saving energy while fully respecting the original design of the master.

«Architecture is truly beautiful if it is still beautiful fifty years after it was built» Gio Ponti

IT Mendini Collection

Design Alessandro Mendini

Il rubinetto disegnato da Alessandro Mendini è un progetto che si distingue per forme essenziali e rigorose, derivate dall'elaborazione del parallelepipedo, un volume puro dal quale far scorrere l'acqua. La collezione nasce da questa geometria semplice, carica di un'elegante forza emozionale, espressa attraverso le linee parallele e le superfici lucide che prendono vita. Una perfetta sinergia tra ricerca estetica e tecnologia.

"Da tempo avevo in mente di disegnare un rubinetto costituito da un parallelepipedo. Un volume elementare da cui far uscire dell'acqua. Sezioni quadre e schematiche, linee parallele, superfici diritte, piatte e lucide. Ecco perciò il rubinetto Euclide, forma primaria di geometria antica. Mamoli mi ha fornito questa occasione. Ha approfondito la tecnica e le funzioni, poi abbiamo articolato tutta la serie, con grande piacere e velocità." Alessandro Mendini, Marzo 2004

EN Mendini Collection

The tap designed by Alessandro Mendini is a project that stands out for its essential and rigorous shapes, derived from the elaboration of the parallelepiped, a pure volume from which water flows. The collection is born from this simple geometry, full of an elegant emotional force, expressed through the parallel lines and the shiny surfaces that come to life. A perfect synergy between aesthetic research and technology.

"For some time I had in mind to design a tap made of a parallelepiped. An elementary volume from which water flows. Square and schematic sections, parallel lines, straight, flat and shiny surfaces. Hence the Euclide tap, a primary form of ancient geometry. Mamoli gave me this opportunity. They studied the technique and the functions in depth, then we articulated the entire series, with great pleasure and speed." Alessandro Mendini, March 2004

Castiglioni Collection

Design Achille Castiglioni

La collezione Castiglioni nasce dai disegni, dagli schizzi e dalle maquette originali di Achille Castiglioni, risalenti agli anni ’80. Il rubinetto che definisce l’estetica dell’intera collezione si distingue per la combinazione di elementi semplici ma di forte impatto visivo. La base cilindrica accoglie con precisione il cilindro della bocca e le due leve, caratterizzate dalla distintiva “linguetta” — elemento chiave dell’intera collezione — nelle iconiche tonalità rosso e blu, che facilitano la lettura immediata delle funzioni. Innovativo nella configurazione, il rubinetto racchiude in un unico monoforo il principio di un tre fori.

Elemento iconico della collezione è anche la placca doccia: la sua presenza discreta ma scenografica cattura lo sguardo, mentre le linee morbide e gli angoli smussati esprimono la combinazione di funzionalità e intelligente ironia che caratterizza l’intera gamma.

“Un oggetto di design è il frutto dello sforzo comune di molte persone dalle diverse specifiche competenze (tecniche, estetiche, industriali, commerciali), il lavoro del designer è la sintesi espressiva di questo lavoro collettivo.” – Achille Castiglioni

Castiglioni Collection

The Castiglioni collection originates from Achille Castiglioni’s original drawings, sketches and maquettes dating back to the 1980s. The tap that defines the aesthetic of the entire collection stands out for its combination of simple yet striking elements. The cylindrical base precisely houses the spout’s cylinder and the two control levers, distinguished by the signature “linguetta” — a key feature of the entire line — in the iconic red and blue shades, ensuring immediate recognition of the functions. Innovative in its configuration, the tap combines the concept of a three-hole system into a single-hole design.

Another iconic element of the collection is the vertical shower plate: its discreet yet striking presence draws the eye, while its soft lines and rounded edges embody the perfect balance of functionality and the intelligent irony that defines the entire range.

“A design object is the result of the collective effort of many people with different specific skills (technical, aesthetic, industrial, commercial); the designer’s work is the expressive synthesis of this collaborative process.” — Achille Castiglioni

IT Hexagonal Collection

Design Storagemilano

Collezione firmata da Storagemilano, che si presenta allo stesso tempo semplice e ricercata. Ogni rubinetto nasce da una barra esagonale di ottone crudo scavata, tornita, scaldata a cannello e poi curvata a mano creando delle bocche dai particolari toni bruciati. Hexagonal è una collezione no finish, senza PVD, cromatura o colorazione, nella quale l'ottone naturale vive, cambia e invecchia con la persona e con il bagno mutando tonalità nel tempo a seconda dell'uso. Una collezione dal forte spirito artigianale i cui singoli pezzi sono unici e sempre diversi. Ecologico, energy saving all'origine, totalmente riciclabile, naturalmente bello, con i segni del tempo, senza sofisticazioni.

EN Hexagonal Collection

A collection designed by Storagemilano, which is both simple and sophisticated. Each tap is created from a hexagonal bar of raw brass that is hollowed out, turned, heated with a torch and then curved by hand, creating spouts with special burnt tones. Hexagonal is a no-finish collection, without PVD, chrome plating or coloring, in which natural brass lives, changes and ages with the person and the bathroom, altering shades over time depending on use. A collection with a strong artisan spirit whose individual pieces are unique and always different. Ecological, energy saving at the origin, totally recyclable, naturally beautiful, with the signs of time, without any sophistications.

IT Paola Collection

Design Paola Navone

La collezione disegnata da Paola Navone, sia per il bagno che per la cucina, nasce con l'intento di aggiungere un tocco di fantasia alla casa, rompendo lo schema convenzionale del rubinetto come semplice oggetto funzionale. La leva di comando, simile a un gigantesco petalo rosso, unisce forza e delicatezza, trasformando la struttura cromata in un elemento ironico, divertente e seducente, capace di ispirare creatività e nuove idee.

EN Paola Collection

The collection designed by Paola Navone, both for the bathroom and the kitchen, was created with the intention of adding a touch of fantasy to the home, breaking the conventional scheme of the faucet as a simple functional object. The control lever, similar to a giant red petal, combines strength and delicacy, transforming the chrome structure into an ironic, fun and seductive element, capable of inspiring creativity and new ideas.

IT Hipster Collection

Design Mamoli R&D

La collezione Hipster trae ispirazione dai rubinetti industriali e dalle manopole da saracinesca, frutto di una ricerca che si allontana dai luoghi comuni. Minimalista ma ricca di stile, austera con il tocco originale delle due manopole a fiore, unisce il fascino retrò ad un'anima decisamente contemporanea.

EN Hipster Collection

The Hipster collection draws inspiration from industrial taps and shutter knobs, the result of research that moves away from commonplaces. Minimalist but full of style, austere with the original touch of the two flower-shaped handles, it combines retro charm with a decidedly contemporary soul.

IT Tuttodunpezzo Collection

Design Arch. Alessandra Bertini

La collezione deve il suo nome alla solidità e al design distintivo, realizzato totalmente in acciaio inox naturale. Tuttodunpezzo si distingue per l'esclusività della sua realizzazione caratterizzata da una sezione estremamente sottile, resa possibile dall'innovativa cartuccia di soli 22 mm, sviluppata per la prima volta da Mamoli. Il rubinetto ha una gamma profonda, esiste infatti in tre misure: per lavabi piccoli, medi o alti, mentre la collezione è disponibile in quattro finiture diverse, tra cui spicca l'acciaio lucido, che offre un'estetica simile al cromo grazie a un processo di semplice lucidatura dell'acciaio.

Un'altra particolarità della collezione Tuttodunpezzo è l'innovativo aeratore orientabile slim spray ITR, in sostituzione del tradizionale soffione doccia che, attraverso ottantaquattro ugelli in silicone Shower Rain-Jet, genera un flusso esteso, percepito dal corpo come una pioggia sottile.

EN Tuttodunpezzo Collection

The collection owes its name to its solidity and distinctive design, made entirely of natural stainless steel. Tuttodunpezzo stands out for the exclusivity of its creation characterized by an extremely thin section, made possible by the innovative cartridge of only 22 mm, developed for the first time by Mamoli. The tap has a deep range, in fact it exists in three sizes: for small, medium or high sinks, while the collection is available in four different finishes, among which the polished steel stands out, which offers an aesthetic similar to chrome thanks to a simple steel polishing process.

Another special feature of the Tuttodunpezzo collection is the innovative Shower Rain-Jet, adjustable aerator, replacing the traditional shower head which, through eighty-four Shower Rain-Jet, silicone nozzles, generates an extended flow, perceived by the body as a thin rain.

IT Pico light Collection

Design Mamoli R&D

Dallo sviluppo della cartuccia più piccola è stato poi sviluppato un rubinetto più sottile per enfatizzare l'aspetto minimal del prodotto. Pico XS, con dimensioni compatte ma un design deciso, offre uno stile discreto per ambienti dinamici e in continuo cambiamento.

EN Pico light Collection

From the development of a smaller cartridge, a thinner tap was then developed to emphasize the minimal aspect of the product. Pico XS, with compact dimensions but a decisive design, offers a discreet style for dynamic and ever-changing environments.

Feel Collection

Design Mamoli R&D

Feel rappresenta un design essenziale, plasmato dalla razionalità e dalla purezza estetica, esaltato dalle superfici levigate e dai tagli geometrici netti. Le sue linee contemporanee e ben definite donano al rubinetto un'impronta grafica sobria, che combina minimalismo e funzionalità quotidiana. Il rigore formale e l'equilibrio stilistico che lo caratterizzano restituiscono al metallo lucente un'eleganza sensuale. Un'espressione di raffinatezza pura.

EN

Feel Ponti Collection

Feel represents an essential design, shaped by rationality and aesthetic purity, enhanced by the smooth surfaces and clean geometric cuts. Its contemporary and well-defined lines give the faucet a sober graphic imprint, which combines minimalism and everyday functionality. The formal rigor and stylistic balance that characterize it give the shiny metal a sensual elegance. An expression of pure refinement.

IT Mademoiselle Collection

Design Mamoli R&D

Questo rubinetto dal design slanciato combina eleganza neoclassica e dettagli contemporanei. La bocca leggermente curvata e allungata richiama lo stile anni ’20, mentre la leva sottile e smussata garantisce praticità. Il corpo alto con base cilindrica conferisce un aspetto moderno e sofisticato, rendendolo perfetto per bagni contemporanei o dal sapore retrò.

EN Mademoiselle Collection

This tap with a thin design combines neoclassical elegance and contemporary details. The slightly curved and elongated spout recalls the 1920s style, while the thin and beveled lever guarantees practicality. Country Collection

Design Mamoli R&D

La collezione Country fonde perfettamente un design retrò con un tocco contemporaneo. Con linee morbide e rotonde, richiama lo stile classico ma è stato rinnovato per adattarsi agli ambienti moderni. La struttura cilindrica, insieme al beccuccio curvo, evoca un look old-style, ma le finiture cromo e nero opaco unite all'impugnatura bianca, aggiungono una nota di freschezza e attualità. È un mix tra tradizione e modernità, che conferisce un'atmosfera rustica, giocosa e divertente, trasformando un oggetto funzionale in un elemento di stile dinamico.

Country Collection

The Country collection perfectly blends a retro design with a contemporary touch. With soft and rounded lines, it recalls the classic style but has been renewed to adapt to modern environments. The cylindrical structure, together with the curved spout, evokes an old-style look, but the chrome and matt black finishes combined with the white handle add a note of freshness and modernity. It is a mix of tradition and modernity, which gives a rustic, playful and fun atmosphere, turning a functional object into an element of dynamic style.

IT Tokyo Collection

Design Mamoli R&D

La collezione Tokyo è una collezione dal corpo pulito ed essenziale, ispirato a un'estetica quasi zen. Al design sobrio della serie originale alla quale si ispira, è stata aggiunta una leva distintiva, che ricorda una pietra preziosa grazie alla sua godronatura verticale. Disponibile nelle finiture cromo e nero opaco con maniglia in ottone, per gli amanti di un tocco più audace, Tokyo è un miscelatore sofisticato che si adatta perfettamente a qualsiasi lavabo o doccia, che combina semplicità e raffinatezza.

EN Tokyo Collection

The Tokyo series is a collection with a clean and essential body, inspired by an almost Zen aesthetic. To the sober design of the original series from which it is inspired, a distinctive lever was added, which recalls a precious stone thanks to its vertical knurling. Available in chrome and matt black finishes with a brass handle, for lovers of a more daring touch, Tokyo is a sophisticated mixer that adapts perfectly to any sink or shower, combining simplicity and refinement.

Design Mamoli R&D

Questo rubinetto si distingue per il design fluido e dinamico, dato dal corpo leggermente svasato alla base che crea un effetto di movimento. La bocca e la leva, piatte e ben proporzionate, donano slancio e leggerezza, mentre le linee arrotondate e i bordi smussati ammorbidiscono l'insieme. Perfetto per bagni in cui l'estetica essenziale si unisce alla funzionalità.

EN Garçon Collection

This faucet stands out for its fluid and dynamic design, given by the body slightly flared at the base that creates an effect of movement. The spout and the lever, flat and well-proportioned, give momentum and lightness, while the rounded lines and beveled edges soften the whole. Perfect for bathrooms in which essential aesthetics are combined with functionality.

IT Shower Rain–Jet

Design Mamoli R&D

Al tradizionale soffione doccia abbiamo sostituito un particolare aeratore Shower Rain–Jet, che genera una piacevolissima sensazione di pioggia.
Attraverso ottantaquattro ugelli in silicone Shower Rain–Jet genera infatti un flusso esteso, percepito dal corpo come una pioggia sottile.

EN Shower Rain–Jet

Rain jet, To the traditional shower head we have replaced a particular slim aerator Shower Rain–Jet, which generates a pleasant sensation of rain.
Through eighty–four silicone nozzles Shower Rain–Jet generates a flow extended, perceived by the body as a thin rain.

PRODUCT CARE RECOMMENDATIONS
Proper regular care and upkeep is necessary to ensure the continued high quality of Mamoli taps. Our recomm.endations:
- always dry the tap fittings with a soft cloth or chamois to prevent the formation of calcium deposits
- use a neutral liquid soap diluted in water for cleaning
- never use liquid detergents that contain abrasive substances, such as vinegar, amm.onium, acetone, bleach, domestic cleaning acids or certain disinfectants. Products like these should not even be used for cleaning the sanitary fixtures in the vicinity of the installed tap.

RECOMMENDATIONS FOR MAINTENANCE
Decalcification: calcium and dirt buildup in the aerator filters may be removed by disassembling the aerator, imm.ersing it in diluted vinegar (maximum concentration of 105 at 20°) and allowing it to soak for several hours. Afterwards, wash it with soap and water and rinse. Spare parts: we recomm.end using original Mamoli parts only, available through authorized retailers.

Mamoli Robinetteria S.r.l. guarantees final users against manufacturing defects in the products found on its price list pursuant to and in accordance with the following terms and conditions.
- 5-year guarantee from the date of purchase for casting and/or porosity defects, unless attributable to improper maintenance by the user. See the product care recomm.endations indicated below.
- 5-year guarantee from the date of purchase for chroming defects, unless they are attributable to improper maintenance by the user. See the product care recomm.endations indicated below.
- 2-year warranty from the date of purchase for all finishes other than chrome.

- 5-year guarantee from the date of purchase for defects related to the functioning of cartridges and thermo-static elements
- 2-year guarantee from the date of purchase for defects related to the functioning of gaskets, o-rings or the command components of electronic and time-delay taps.

The guarantee only becomes applicable upon presentation of the original guarantee voucher (included in every package), which must bear the retailer's stamp indicating the date of purchase and be accompanied by the receipt or some other proof-of-purchase document. Moreover, the guarantee is only applicable if Mamoli receives notification within twenty days of when the functional defect is first discovered, and it may only be activated within six months after notification has been received.
The guarantee does not apply to cases in which defective operating is attributable to post-purchase events that are in no way attributable to Mamoli, such as:
- improper installation of the product
- performance of repairs or maintenance by unauthorized personnel
- malfunctions attributable to shortcomings or defects in the system that the Mamoli products were connected to
- deterioration of non-chrome finishing whose duration is dependent on user upkeep and maintenance

The present conventional guarantee relieves Mamoli of any and all liability for its products and in particular any liability for any direct or indirect damage derived from variations in the products themselves. Mamoli accepts responsibility for the safety of its products pursuant to the current laws on manufacturer liability.
